3	#9 Candidate Iota	22	16.67%	
Margin: 6 votes - 4.55% HHI: 0.376 Effective candidates: 2.66				

METHODOLOGICAL AND SECURITY NOTE

Counts shown in the final report are exact database totals, not survey estimates. Vote share uses valid votes for each office. The margin compares the two highest totals. HHI is the sum of squared vote shares and its reciprocal is the effective number of candidates. Ties are declared and never resolved automatically. The QR code links to the public verification record; the SHA-256 fingerprint detects any change to the certified report. These integrity markers complement, but do not claim to replace, a qualified electronic signature.

SPECIMEN ONLY - Candidate names and values on this page are fictional and must not be interpreted as election results.
